Change Request #:11-07**

Requestor Name:	Christopher Johnson	Date:	05-19-2011	Affiliation:	
Email Address:	Christopher.johnson@spr.doe.gov	Phone No:	504.734.4718	DOE	
				Contractor	X
Proposed Change:	Add a usage code for Electrical Power Supply/Distribution for buildings.				
Justification:	<p>Our facilities are powered by electricity. There is not currently a usage code that supports the function of our buildings that house the electrical distribution systems and power supplies for electrical pumps and motors.</p> <p>In every case where 615 = Electrical/Motor Repair Shop was chosen for a usage code, the building has large electrical switches to motors and pumps. Having an Electrical Distribution or Power Supply usage code would better define our building's use, especially where the building only exist to house electrical distribution systems and active circuit breakers, but lack a computer system to control operations.</p>				
Please Do Not Type Below This Line					
Remarks by FAC:	<p>07/20/2011 – Christopher Johnson will provide a definition prior to next meeting so that everyone can get an understanding of the new proposed usage code. This will be discussed at next FAC conference call.</p> <p>08/17/2011 – FAC Recommended</p> <p>New usage code will be 595 – Buildings that are used to house electrical distribution equipment, or components of a electrical distribution system parallel to electrical transformers, breakers, and electrical gauges.</p> <p>08/31/2011 – FDDC Approved</p> <p>09/29/2011 – Implemented into FIMS v2.1</p>
