Proposed Change:	<p>Add the following usage code to the FIMS OSF package:</p> <p>2921 Tunnel (Research and Development) (UOM Sq. Ft.)</p> <p>A unique underground test bed or experimental complex used to conduct research and development activities.</p>				
Justification:	<p>FIMS currently does not have a usage code for tunnels of this nature. Because of this there is no way to properly identify these assets in order to track necessary data. Our current tunnels are very expensive and generate a lot of maintenance dollars that should be tracked properly.</p>
