Change Request #: 13-09**

Requestor Name:	Stuart Saslow	Date:	2/1/13	Affiliation:	
Email Address:	Stu.saslow@pnnl.gov	Phone No:	509 372 6012	DOE	
Man Hours to Implement:		HQ Program Ofc:	SC	Contractor	Y
Proposed Change:	<p>Add an "All Areas" to the Area picklist on the Property List screen.</p> <p>It should be the default (or at least allow the default to be user definable)</p> <p>When Area=All Areas it should allow FIMS users to scroll down through a complete list of all of a Site's assets, overcoming the current select criteria limitation which only allows a site to see/scroll/edit subsets of assets within one area. Subsets would still be available also, as users could continue to choose the area subset they want to see- just as it operates today.</p>				
Justification:	<p>I hesitate to assign individual "areas" to our assets because it looks like on the FIMS property list screen I will no longer be able to scroll down through a complete list of all our properties- only being able to see lists of properties within one area.</p> <p>This will allow sites to fully utilize the Area field, and there will be no loss of functionality whatsoever (and no extra keystrokes) to how the screens work today</p>
