| Proposed Change:                          | Modify the adhoc report tool to indicate "greyed out" fields in Excel.  |           |              |              |   |
| Justification:                            | <p>Currently "greyed out" fields are indistinguishable from blank fields.</p> <p>Greying out fields would help identify blank fields at a glance.</p> <p>This would help the field and headquarters in their quest for data completeness.</p>   |           |              |              |   |

| OAPM Remarks:                             | <p>10/27/2014 - After several discussions with Larry Bridges, an approach has been agreed upon that will satisfy this request. A link will be provided within FIMS that will contain a listing of all data elements (sorted alphabetically) that will identify if a particular data element is available for entry based on Property Type and Ownership. A sample format is attached. The cosmetic look of the final product will change once implemented into the FIMS software.</p> <p>10/28/2014 – OAPM Approved for implementation.</p> |           |              |              |   |

| Implemented:                              | 01/20/2016 – Cancelled by Adam Pugh (MA-50). Information is available in FIMS User's Guide.   |           |              |              |   |
