Change Request #: 16-16**

Requestor Name:	Sharon Campbell / Steve Hart	Date:	5/16/16	Affiliation:	
Email Address:	Sharon02.campbell@srs.gov	Phone No:	803-952-9742	DOE	
Program Office:	EM			Contractor	X
Proposed Change:	Add a PBPI button to In-Situ status "Building" type maintenance tab for Inspection Date or set system up to automatically flag property with In-Situ Status and disengage "inspection date" data element.				
Justification:	Currently, inspection date is required for Building property on InSitu status property. However, when the doors are grouted and sealed shut, there is no entrance into the property to inspect. With no entrance into the property, a condition inspection can't be performed. Currently, there is no way for the inspector to flag this property as a PBPI and disengage the "inspection date" data element.				
Please Do Not Type Below This Line					
FAC Remarks:	08/17/2016 – FAC Not Recommended. There is no need for an additional data element to be added to buildings. As part of the Long Term Monitoring of these types of assets, there are still visual inspections of these assets from the outside. Despite the fact you cannot enter these types of facilities, the exterior inspection can count as a condition assessment inspection and therefore the date of these inspections should be entered into FIMS for the Inspection Date.
